

Watersheds as Places for Health and Well-being

watersheds

WATERSHEDS AS SETTINGS FOR HEALTH AND WELL-BEING

- Network for Ecosystem Sustainability and Health (NESH)
- Public Health Agency of Canada (PHAC)
- Five or six Canadian watersheds:
Ontario (2) BC (2) Alberta(
Manitoba (1)

Watersheds as settings for health and well-being

- Study will include:
 - Self assessment framework
 - Report synthesizing findings from 5 self assessments
 - Emphasis on policy implications of watersheds support for human health and wellbeing (HHWB)
- Resources:
 - small grant (~4000)
 - Travel support to conference in Winnipeg in March

the prism model

Six axes:

Ecosystems-health/wellbeing

Watersheds-ecosystems

Watersheds-health/wellbeing

Watersheds-social systems

Social systems-health

Ecosystems-social systems

Four perspectives:

A: watersheds-ecosystems -social systems

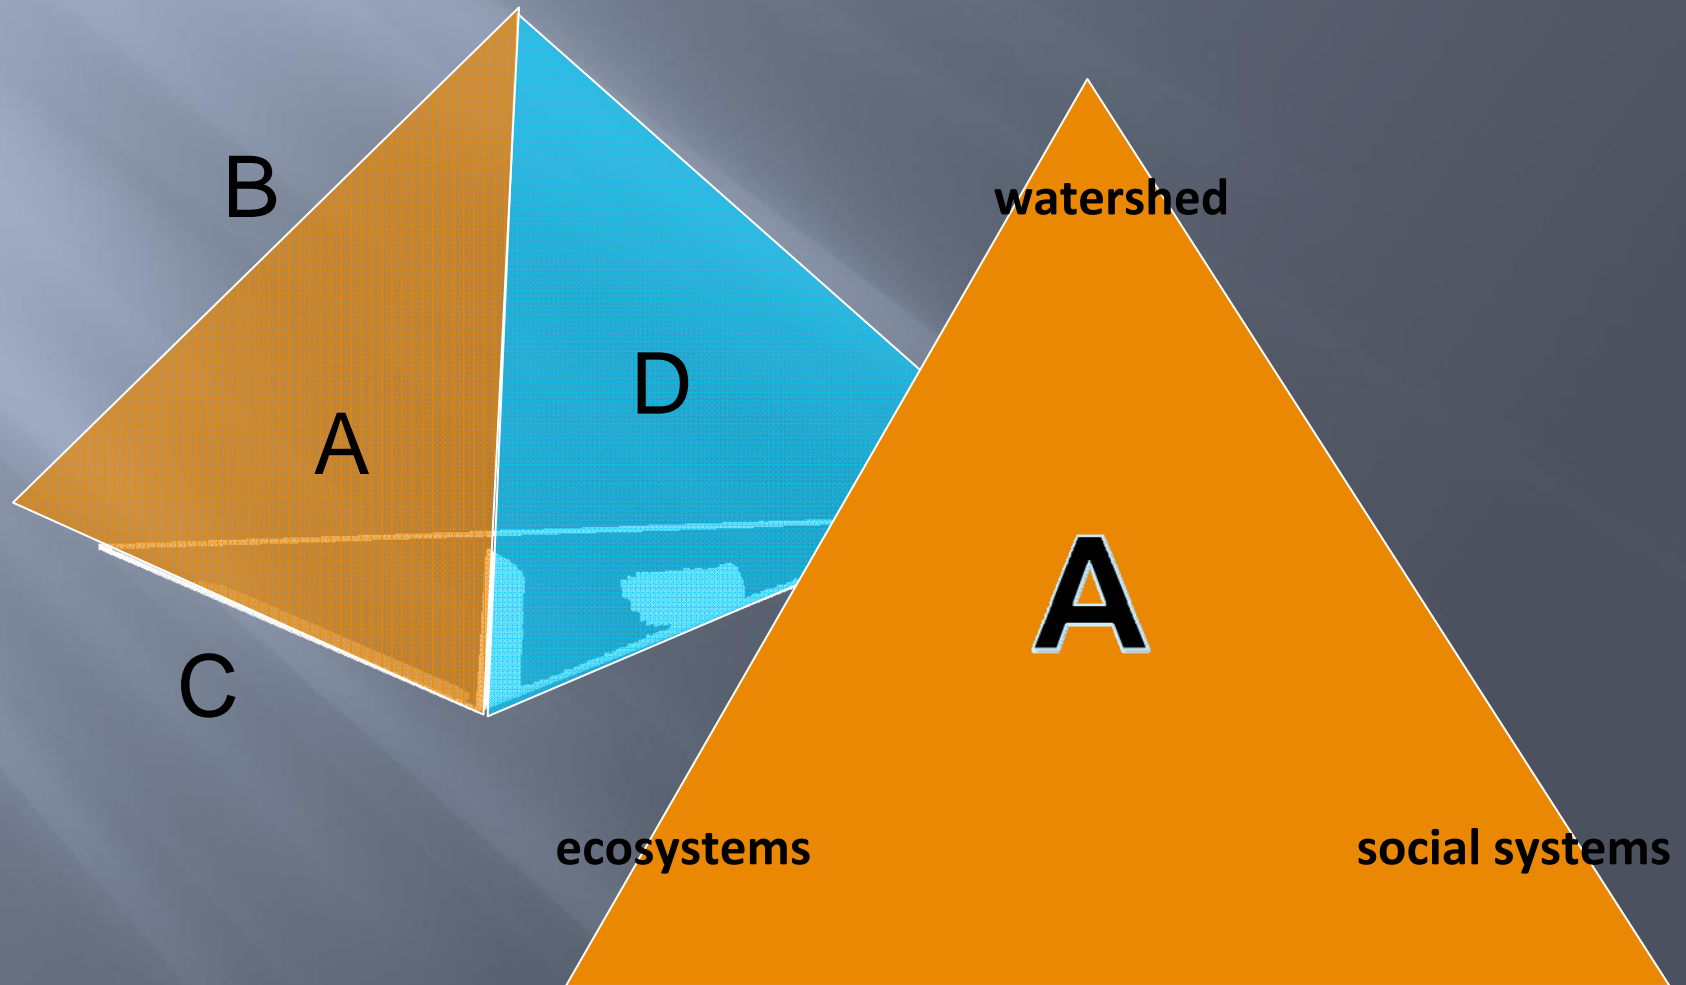

B: watersheds-ecosystems-health /wellbeing

C: watersheds-social systems-health/ wellbeing

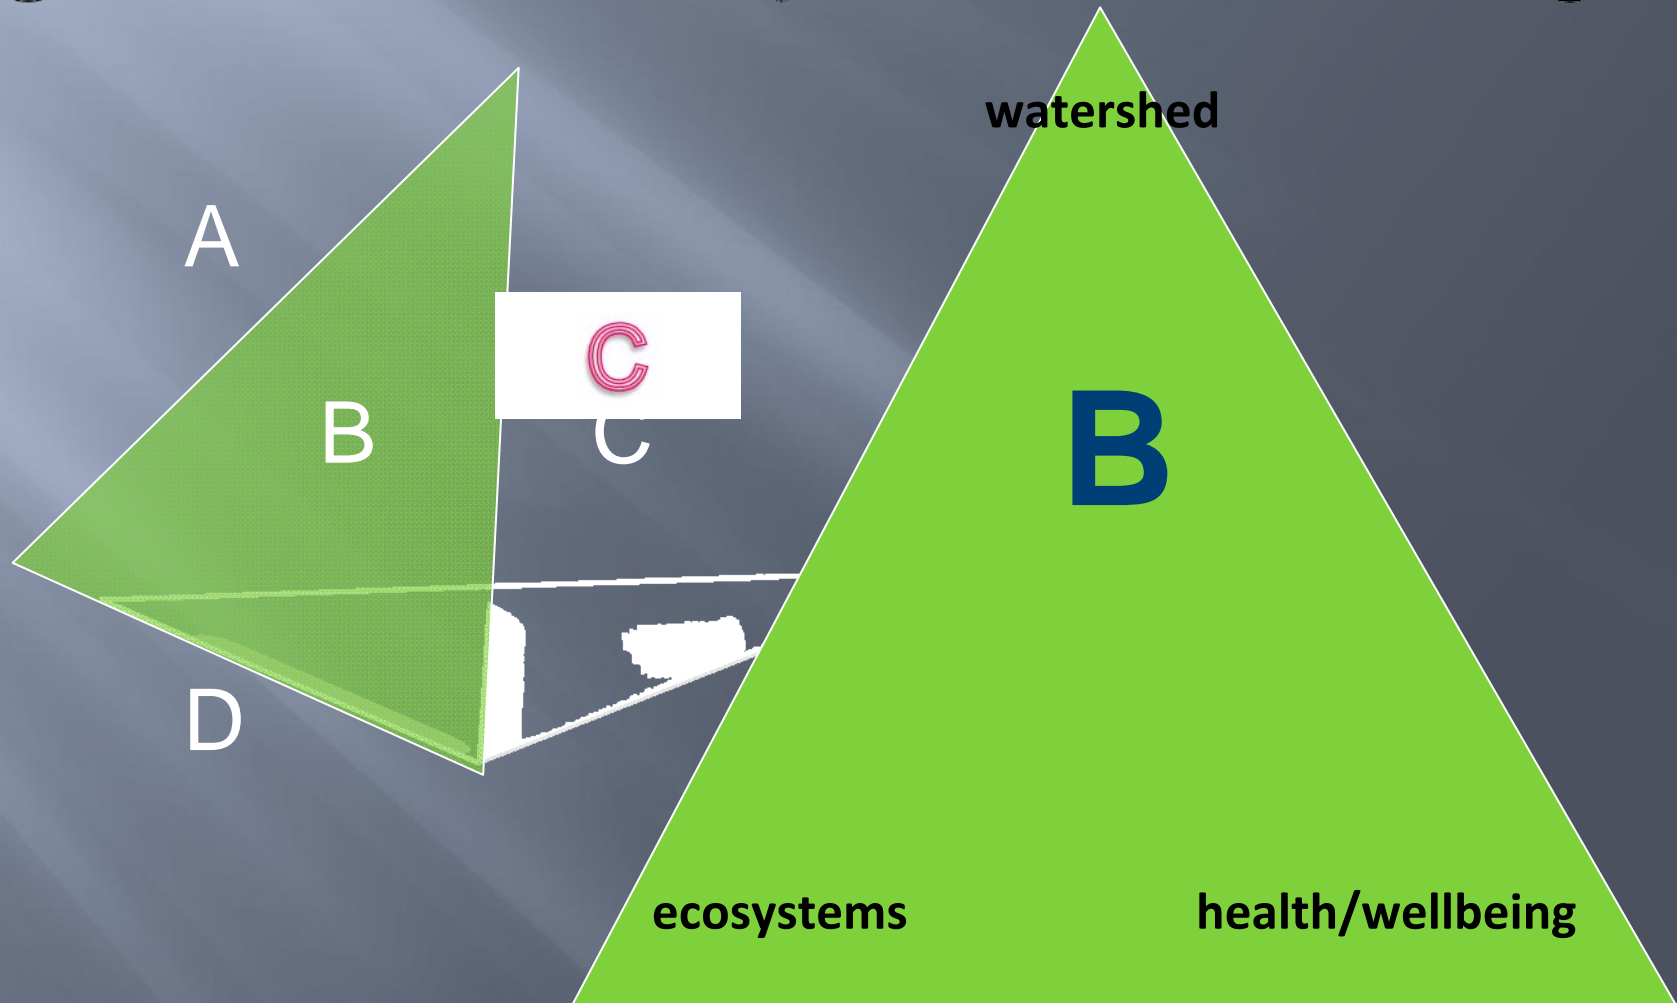

D: ecosystems-social systems-health/wellbeing

Perspective A

watersheds-ecosystems-social systems
governance for sustainable development

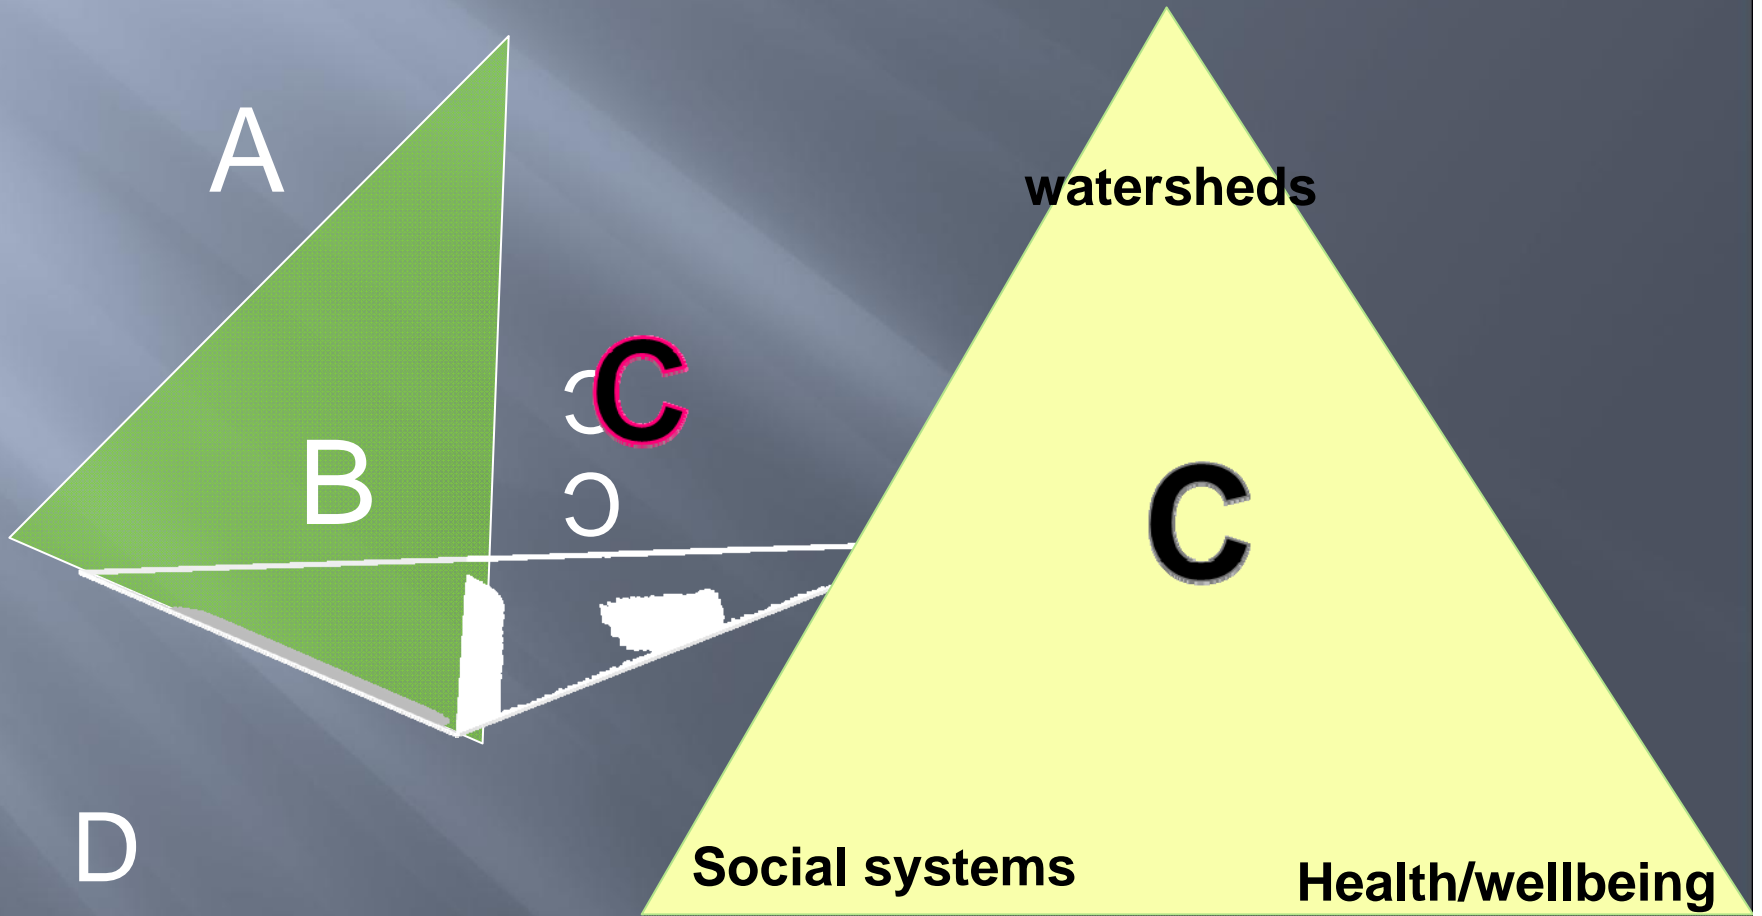

Perspective B: watersheds-ecosystems-health/wellbeing governance for ecosystems and wellbeing

Perspective C:

watersheds-social systems-health/wellbeing
governance for social determinants of health

Perspective D: ecosystems-social systems-health/wellbeing: governance for socio-ecological health promotion
