Subject: RE: Cowichan Watershed Board (2013-99)

Hi Alison,

Thank you for your responses to my questions.

- 1) The Foundation accepts your request for an extension until March 31, 2018 based on the rationale you outline in your interim report and addendum.
- 2) The Foundation approves postponing the Implementation of CEEMP and reallocating funding to Water Quality/Estuarine Health Project (\$63,500) and to Succession Bridging (\$20,000) as you lay out, and in keeping with the intent of the project
- 3) Hi and all the best to Roger!

Thanks,

David

Interests:

I have been involved with water, hydrology and climate change in the Oceanside area for about 25 years. Engaged with many groups organisations and local government initiatives

I was at a meeting on Saturday at which Mayor Jon Lefebure made a presentation. I mentioned this new website for interest with some comparative issues. The Englishman River has averaged less than 1 cubic meter per second during the summer is now at about 2 cu / m / sec. The following link show a similar situation to the 'bluff' on the Cowichan River.

http://www.ouroceansidewater.com/uploads/1/8/8/5/18858082/the_clay_banks_on_the_englishman.pdf

Comments:

Hi Folks, Sharon Tomczyk (my daughter) and I have been working on this independent water related website, <http://www.ouroceansidewater.com>

it is a work in progress and I will be adding more material as time permits. Please click a few drips to see what is going on between those clouds hanging overhead to the water from your tap.
Any feedback will be appreciated.

Cheers ...Trevor Wicks ...

Greetings to:

Cowichan Watershed Board and Cowichan Tribes Referrals Coordinator

Today, I have an announcement to share with you, and through you to your networks, organizations, and Tribal Councils:

Salt Spring Island Watershed Protection Authority is celebrating the release of the [St. Mary Lake Integrated Watershed Management Plan 2015](#)

The Plan is a technically-rigorous, feasible and community-supported approach to cooperative watershed management. The Plan is the result of innovative multi-stakeholder and multi-level government collaborative planning in the province, and it is a first for Salt Spring Island.

It also appears in the media on the [Salt Spring Exchange](#). And, here in the [Gulf Islands Driftwood newspaper](#).

SSIWPA invites collaboration with other watershed stewardship, management, governance or community groups in the region.

Thank you for your support of the work of cooperative watershed governance in communities like the one on Salt Spring Island, B.C. Thank you for the work you do!

Sincerely,

Shannon Cowan and the team at SSIWPA
