Hello, Jill

Hope you and family are well, and looking forward to shots in the arm, with a good summer to follow!

I've posted, below, a link to a recent CBC article. May I request that, at your convenience, you share it with the Board? I hope it's relevant, given the paddlesport's current proposal to see recreational features added to the weir design project.

Some background on the article:

The annual Horsefly River sockeye run is spectacular! To reach the Horsefly River, sockeye must swim up the Fraser River to Quesnel, then up the Quesnel River to Quesnel Lake, THEN up the Horsefly River.

The Quesnel and Horsefly Rivers are renowned whitewater destinations. Salmon and paddlers continue to share these rivers in harmony.

Thanks, Jill!

Cheers
Rick
