**Please join us for Green Shores® training in
Nanaimo this November!**

Green Shores® Training Opportunity November 2024

The [Pacific Salmon Foundation](#) (PSF) is partnering with the [Stewardship Centre for BC](#) to deliver Green Shores® training *free of charge* for anyone interested in learning how to

better apply nature-based solutions along the shorelines of eastern and southern Vancouver Island. This unique opportunity is being funded through a five-year initiative called [Resilient Coasts for Salmon](#) that is intended to raise awareness about the design and benefits of nature-based solutions while building capacity in communities to adapt to climate change and sea level rise.

We would like to invite you to register for a Green Shores Level 2 training workshop:

- Green Shores Level 2 held at **Vancouver Island University in Nanaimo on November 19 and 20**, located within the traditional territory of the Snuneymuxw First Nation.

For more details about Green Shores training, and to register, visit the [University of Victoria](#) website or click the links below.

***Please note that to register for an L2, you must have completed Green Shores L1. Keep an eye on your inbox for more L1 offerings through the Resilient Coasts program!**

Register here for Level 2

Whether you are a coastal engineer, contractor, stewardship volunteer, member of local municipal or Indigenous government or a shoreline-conscious community member, Green Shores training will help you diversify your skills by building your knowledge of coastal processes and nature-based alternatives that will foster shoreline resilience, improved habitat, and enhanced aesthetics.

Resilient Coasts for Salmon is a collaborative initiative led by the Pacific Salmon Foundation with partners such as the Stewardship Centre for BC, World Wildlife Fund - Canada, Peninsula Streams Society and others. Resilient Coasts for Salmon is funded in part by the Government of Canada.
